

URGENT WATER CONSERVATION NOTICE

Due to an issue at the City's water treatment plant, all residents and businesses are required to immediately discontinue lawn watering and all other nonessential or excessive water use until further notice.

Please limit water use to essential household and business needs only. Avoid watering lawns and gardens, washing vehicles, filling swimming pools, and any other activity that uses large amounts of water.

Your immediate cooperation will help maintain adequate water service while the issue is resolved. The City will issue an update when these restrictions are lifted.

Thank you for your patience and cooperation.
